Task Sheet No. 6:
DAILY LESSON PLAN WITH INSTRUCTIONAL MATERIAL INTEGRATION AND ICT APPS

INSTRUCTION:

As a pre-service teacher, you are tasked to develop a **detailed lesson plan** based on the identified learning competencies, standards, objectives, and content area. Using the prescribed lesson plan format (follow the ILAW Framework), design a learning experience that demonstrates clear alignment among the learning intentions, learning activities, instructional materials, ICT integration, assessment strategies, and intended learning outcomes. The lesson should maximize opportunities for integration and contextualization and should be inclusive and responsive to learners with diverse abilities, learning needs, cultures, barriers, and unique contexts.

Your completed lesson plan will serve as a professional teaching document that another teacher can implement with minimal or no additional explanation. Ensure that the learning experiences are logically sequenced, the instructional materials and ICT resources are appropriate and effectively utilized, and assessment strategies provide evidence of learners' progress and achievement. Include appropriate ways forward and interventions based on learners' performance and reflection. Submit the completed lesson plan within the prescribed period for evaluation and feedback.

RUBRIC FOR GRADING:

CRITERIA	EXCELLENT	PROFICIENT	DEVELOPING	BEGINNING
Intensions (10%)	Intentions are clearly and appropriately stated, with relevant learning competencies accurately articulated. Strong coherence and alignment are evident across all sections of the DLL. ✓	Intentions are clearly stated, with appropriate learning competencies articulated. Coherence and alignment are evident across most sections of the DLL, with only minor inconsistencies.	Intentions are partially stated, and the learning competencies are somewhat appropriate but may require clarification. There are inconsistencies across several sections.	Intentions are unclear, incomplete, or inappropriate, and the learning competencies are not articulated. Little or no alignment is evident across the sections of the DLL.
Instructional Materials (20%)	ICT and other learning resources/materials are carefully selected, well-prepared, and effectively utilized. They are highly appropriate to the learners, strongly aligned with the learning intentions (competencies, standards, and objectives), and directly support the content and intended learning outcomes. ✓	ICT and other learning resources/materials are appropriately selected, prepared, and utilized. They are aligned with the learning intentions and content area and generally support learners in achieving the intended outcomes.	ICT and other learning resources/materials are partially appropriate or inconsistently utilized. Alignment with the learning intentions and content area is evident but has some gaps, limiting their effectiveness in supporting learning.	ICT and other learning resources/materials are inappropriate, insufficiently prepared, or minimally utilized. They show little or no alignment with the learning intentions and content area and provide limited support for learning
Learning Experience Design (10%)	The learning experience is clear, ✓ detailed, and logically sequenced. Another teacher can implement	The learning experience is clear and logically organized. Another teacher can implement the lesson	The learning experience is partially clear or inconsistently organized. Another teacher may require	The learning experience is unclear, incomplete, or poorly organized. Another teacher would require

	the lesson independently without additional explanation. Learning design principles are intentionally and consistently embedded throughout the lesson.	with minimal clarification. Learning design principles are appropriately embedded in most parts of the lesson.	additional explanation to implement some parts. Learning design principles are partially evident.	substantial explanation to implement the lesson. Learning design principles are not evident or appropriately embedded.
Learning Experience for Opportunities and Inclusivity (20%)	The learning experience maximizes available opportunities for integration and contextualization. Instructional materials and activities are highly relevant to different learners' styles and are inclusive and responsive to learners with disabilities, barriers, and diverse culture or unique contexts.	The learning experience provides appropriate opportunities for integration and contextualization. Instructional materials and activities are relevant to different learners' styles and are inclusive and responsive to most learners with disabilities, barriers, and diverse culture or unique contexts.	The learning experience provides some opportunities for integration and contextualization. Instructional materials and activities are somewhat relevant to different learners styles and are partially inclusive and responsive to learners with disabilities, barriers, and diverse culture or unique contexts.	The learning experience provides limited opportunities for integration and contextualization. Instructional materials and activities are not sufficiently relevant to different learners styles and are limited in being inclusive and responsive to learners with disabilities, barriers, and diverse culture or unique contexts.
Assessment Strategies (20%)	Assessment strategies are intentionally integrated throughout the session and effectively monitor learners' progression. They generate clear and sufficient evidence of whether learning outcomes have been achieved and inform subsequent teaching decisions.	Assessment strategies are integrated at appropriate points in the session and provide evidence of learners' progress and achievement. The results generally support instructional decisions.	Assessment strategies are present but inconsistently integrated. They provide limited evidence of learners' progression or achievement and only partially inform instructional decisions.	Assessment strategies are limited, inappropriate, or disconnected from the learning experience. They provide little or no evidence of learners' progress or achievement.
Ways Forward and Interventions (20%)	Ways forward and interventions are specific, practical, and actionable, clearly indicating how learning will be extended, enriched, or adjusted based on learner performance and reflection.	Ways forward and interventions are appropriate and actionable, providing reasonable adjustments or extensions based on learner performance and reflection.	Ways forward and interventions are general or partially actionable. Connections to learner performance and reflection are limited.	Ways forward and interventions are unclear, impractical, or absent, with little evidence that learner performance or reflection informs subsequent learning.

Can Task Sheet No. 6
DAILY LESSON PLAN

Lesson Title	Alcoholic and Non-Alcoholic Beverages
Learning Area/s	TLE-FCS Food Service
Name of Student Teacher/s	John Brix G. Coronejo
Name of Cooperating Teacher	Cristy S. Conopio
Grade Level and Section	Grade 10 – ATHURIUM / ASTER
No. of Sessions	1 Session
References *Books, websites, toolkits, etc.*	DepEd MATATAG Lesson Exemplar for TLE-FCS Food Service Grade 9/10 Quarter 2/4 Lesson 1 (Day 1); DepEd MATATAG Curriculum Guide for TLE – Food Service; Budget of Work for Grade 10 – TLE: FCS – Food Service; Nawon Food and Beverage (2024), *Types of drink: Explore the differences between types of beverages*; Castro, Lorena A. (2016), *A Module In Food And Beverage Service III*, PNU-ITL.
Declaration of AI use *Cite how AI was used in the formulation of the lesson plan. See DO3. 2. 2026 Annex A*	AI was used to organize the DLP structure, align objectives with the MATATAG Lesson Exemplar, improve wording, and suggest integration opportunities. The teacher reviewed and validated all content before use.

Intentions

Meaningful learning experiences are anchored in how we frame them. Start by deciding what you want learners to master by the end of the lesson – keep it clear and simple.
Remember: Understanding your learner's evolving context and designing around it ensure that your lessons connect with and are relevant to them.

Learning Competency and Curriculum Standards: *Write the competency/ies from the curriculum that we are targeting, and the content or performance standards applicable to the sessions*	**Learning Competency:** • Differentiate alcoholic and non-alcoholic beverages. **Content Standards:** The learners should have knowledge and understanding of: • Demonstrate an understanding of the concepts and principles of alcoholic and non-alcoholic beverages. **Performance Standards:** By the end of the term, the learners are able to:

	• The learners create non-alcoholic beverages following the safety precautions that can be used in generating business ideas.
Learning Objectives: *Write the smaller knowledge, skills, or tasks from the competency that the learners will work on and be able to show by the end of the sessions.*	• **Knowledge:** Define beverage, alcoholic beverage, and non-alcoholic beverage, and differentiate them based on the presence of ethanol (ethyl alcohol) and Alcohol by Volume (ABV). • **Skill:** Classify various commercial and everyday beverage examples into alcoholic and non-alcoholic categories through a collaborative board activity. • **Attitude:** Demonstrate attentive listening, teamwork, and responsible awareness of age restrictions and health implications in beverage service.
Learner Context: *Write your observations of your learners, and how they have been performing or responding to learning experiences recently. Include strengths, interests, and possible barriers to learning.*	Learners are familiar with common drinks consumed at home, school, or retail stores (such as sodas, bottled tea, juices, and coffee) and have observed adult drinks during family gatherings or local celebrations. However, they require formal grounding in the operational definition of beverages, the chemical distinction of ethanol as a depressant psychoactive drug, understanding ABV percentages, and recognizing the basic divide between alcoholic and non-alcoholic categories.

Learning Experience	Learning experience is like a thoughtfully designed journey. Each activity and intersection builds towards meaningful understanding and growth. Identify activities and interactions to help learners gain knowledge, skills, or understanding in a purposeful and coherent way.	
	TEACHER'S ACTIVITY	**STUDENT'S ACTIVITY**
Pre-Lesson: *Describe how you will help the learner get ready for the lesson.*	**1.Daily Routine & Cleanliness Check** • The teacher greets the class: *"Good morning, Grade 10! Please stand up for our opening prayer. Mark, kindly lead the prayer."* • The teacher inspects the physical learning environment: *"Before sitting down, please look under your chairs, pick up any loose pieces of paper, and arrange your chairs neatly in straight lines."* • The teacher checks attendance:	The learners stand respectfully. Mark leads: *"Let us bow our heads and feel the presence of the Lord. Amen."* • The learners pick up trash, align their chairs, and take their seats attentively.

	"*Class secretary, who is absent today?*" • The teacher checks attendance: "*Class secretary, who is absent today?*"	• The class secretary stands: "*Good morning, Sir. There are no absentees today; everyone is present.*"
	2. Activating Prior Knowledge: RESET THE SET! • The teacher reviews the previous lesson on table setting and appointments: "Last week, we discussed table appointments and service sequence. Let us look at the pictures on the screen for 'RESET THE SET!' Who can state the three basic re-setting steps after guests leave a dining table?"	Sarah raises her hand: "Sir, Step 1: Clear the table after guests leave. Step 2: Change linens neatly and ensure no crumbs fall to the floor. Step 3: Place the necessary fresh table setup."
	• The teacher asks: "*Why do we need to re-set the dining table promptly and properly?*"	• Sarah adds: "To keep the dining area clean and prepare it for incoming guests."
	3. Establishing Lesson Purpose & Motivation: POV Scenario • The teacher presents a scenario slide: "Tell me your thoughts on this: POV: You are a barista in a café or a bartender at a local bar. What will be your signature drink, and what other drinks will you recommend to a customer?"	• Learners smile and show excitement. • Joshua raises his hand: "Sir, as a barista, my signature drink is an iced Spanish latte, and I'd recommend cold brew coffee!"
	• The teacher connects: "Notice that some of your drinks contain no alcohol, while others do. Today, in Session 1, we will explore the foundational definitions and fundamental boundary separating alcoholic and non-alcoholic beverages."	• Rhea answers: "As a bartender, my signature drink would be a virgin strawberry mojito mocktail, but I could also serve chilled beer to adults!" • The learners listen attentively and open their TLE notebooks

Lesson Flow: *Describe the activities that you can implement in 1 or more session to meet your intentions.* Apply the Learning Design Principles, use the prompts below as a guide. Note, not all principles are expected in every lesson. • *Make the objectives clear for the learners* • *Guide learners before letting them try the task on their own* • *Check the state of the learners' well-being, understanding, and mastery over the lesson* • *Connect today's new concepts to past competencies* • *Encourage collaboration among learners* • *Invite learners to reflect on why this matter to them* • *Ensure inclusion for learners' varied abilities, learning styles, and contexts*	**1. Unlocking Content Vocabulary (7 minutes)** • The teacher presents the core terminology on the slide deck: * **Beverage:** A drink or liquid meant for human consumption that satisfies thirst and holds cultural significance. * **Alcoholic Beverage:** A drink comprising ethanol (ethyl alcohol) created through the fermentation of grains, fruits, or sugar sources. Ethanol falls under the category of depressant psychoactive drugs. * **ABV (Alcohol by Volume):** The global standard measurement representing the volume of pure alcohol in 100 mL of liquid at 20°C, typically indicated as a percentage on product packaging. * **Non-Alcoholic Beverage:** A drink with minimal to zero alcohol content (typically under 0.5% ABV), crafted for individuals refraining from alcohol consumption. * **Barista vs. Bartender:** A barista specializes in coffee making, while a bartender mixes and serves drinks (including alcoholic beverages) at a bar. • The teacher asks: *"Class, what chemical substance strictly separates an alcoholic drink from a non-alcoholic drink?"* **2. Discussion & Master Taxonomy Tree (8 minutes)**	• The learners read each definition aloud and record the terms in their notebooks. • Christian answers: "Sir, ethanol or ethyl alcohol!" • The learners examine the taxonomy tree diagram on the screen and sketch the two primary branches in their notebooks.

	• The teacher displays the Master Beverage Taxonomy Diagram: * **BEVERAGES** 1. **Non-Alcoholic Beverages** (Stimulating, Refreshing, Nourishing) 2. **Alcoholic Beverages** (Fermented vs. Distilled)	
	• The teacher explains: "In this session, we focus on establishing the baseline difference between these two main branches. Non-alcoholic drinks replenish fluids or provide energy without intoxication. Alcoholic drinks contain ethanol, which slows down the central nervous system and requires responsible service and legal age limits under the law." • The teacher shows clean sample packaging: an empty can of soda (0.0% ABV) and an empty commercial beer bottle displaying 5.0% ABV.	• The learners observe the actual sample containers displayed by the teacher.
	• The teacher asks: *"Where can you find the ABV on a bottle, and why is this label required?"*	• Maria answers: "Sir, it is printed on the back or side label to inform consumers of the alcohol concentration and prevent minors from consuming it."
	3. Collaborative Activity: 'The Great Beverage Sort' (10 minutes) • The teacher divides the class into 4 learning groups and distributes activity envelopes containing 10 beverage flashcards:	• The learners open the envelope, examine the drink cards, discuss whether items contain alcohol, and paste each card under the correct column on their T-chart.

	(Brewed Coffee, Mineral Water, Draft Beer, Orange Juice, Red Wine, Cola, Milk, Gin, Hot Chocolate, Vodka) • The teacher gives the mechanics: "On your manila paper, draw a T-chart labeled 'Non-Alcoholic Beverages' on the left and 'Alcoholic Beverages' on the right. You have 5 minutes to classify all 10 cards and identify the beverage by name. Be ready to defend one item when called." • The teacher moves around the classroom to observe student collaboration and guide groups.	• Group members verify: "Cola, coffee, juice, chocolate, and milk go to Non-Alcoholic; beer, wine, gin, and vodka go to Alcoholic!"
Learning Resources: *List down the learning resources that will help you reach your objectives. Ensure that they are available and inclusive.* *Include options and alternatives in case of emergencies.*	• The teacher prepares: Laptop, LCD projector, slide presentation containing vocabulary and taxonomy tree, clean sample empty containers (soda can and beer bottle showing ABV labels), marker pens, and 4 activity task envelopes. • Emergency fallback: Printed classification flashcards and diagrams in case of power interruption.	• The learners use: TLE notebooks, pens, manila paper, glue sticks, and flashcards provided in the group envelopes.
Opportunities for Integration and Contextualization: *Write down any possibilities to meaningfully connect to another learning area, special topic, local context, or technology. Write N/A if none.*	• **Science Integration:** The teacher highlights that ethanol is a depressant psychoactive drug produced by yeast converting sugar into alcohol, which directly affects the central nervous system. • **SDG 12 (Responsible Consumption and Production):** The teacher discusses moderation, health consciousness, and avoiding substance misuse.	• The learners connect the discussion with biology lessons on chemical reactions and the physiological effects of substances on the human brain and body.

	• **Legal & Cultural Context:** The teacher asks: *"Under Philippine laws and local ordinances, why are food establishments strictly prohibited from serving alcoholic drinks to minors?"*	• The learners discuss the importance of respecting age regulations to ensure public safety and responsible hospitality service

Assessing Learning

Assessments reveal what learners have gained and what they still need help with. These are helpful in providing you with information to guide your future instruction throughout the entire session.

	TEACHER'S ACTIVITY	STUDENT'S ACTIVITY
Formative Assessment: *Create a task, activity or questions to assess learning and provide feedback every now and then. Include ways for learners to ask for guidance or support throughout each session.* *Remember to provide appropriate accommodation so all learners can demonstrate their understanding (e.g. varied response formats, small group options, visual or auditory supports).*	**1. Output Verification & Synthesis (3 minutes)** • The teacher asks Group 1 and Group 3 to quickly raise and showcase their completed T-chart boards. • The teacher affirms: *"Excellent work! All groups categorized the items accurately."* • The teacher asks: *"Who can synthesize the primary difference between alcoholic and non-alcoholic beverages in one clear sentence?"* **2. Written Formative Assessment (10 Items)** • The teacher instructs learners: *"Clear your desks except for a 1/4 sheet of paper. Write ALC if the item is an Alcoholic Beverage and NON if it is a Non-Alcoholic Beverage:"*	• Groups display their output boards for quick visual validation. • Patricia answers: "Alcoholic beverages contain ethanol created by fermentation and carry an ABV percentage, while non-alcoholic beverages contain minimal to zero alcohol and do not produce intoxicating effects." • Learners clear their desks and independently answer the quiz on their 1/4 sheet of paper:

	1. *Hot Brewed Arabica Coffee* 2. *Draft Beer (5% ABV)* 3. *Sparkling Mineral Water* 4. *Distilled Vodka* 5. *Fresh Mango Juice* • The teacher directs learners to exchange papers for immediate peer checking and reveals the answers on the screen. • The teacher facilitates immediate peer checking and reveals the answer key.	*Learners' Written Answers:* *1. NON* *2. ALC* *3. NON* *4. ALC* *5. NON* • *The learners exchange papers, check their seatmates' work, and return the papers.*

Ways Forward

Meaningful learning can also happen beyond the classroom – for both the learners and the teacher. Pause and reflect on what happened today.

	TEACHER'S ACTIVITY	STUDENT'S ACTIVITY
Extended Learning Opportunities: *Suggest other learning experiences outside the classroom/class hours that learners may want to access to reinforce what they have learned, to spark their curiosities further, or that may provide them support in their areas of difficulty.*	• The teacher presents the assignment: "For our extended learning and preparation for Session 2: 1. Inspect 3 drink containers in your home pantry or neighborhood sari-sari store. Write down their brand name, whether they are alcoholic	• The learners copy the assignment into their TLE assignment notebooks and ask any final clarifying questions.

	or non-alcoholic, and their listed alcohol content (% ABV or 0%). 2. Advance Reading: Preview the subcategories of non-alcoholic drinks: Stimulating, Refreshing, and Nourishing beverages."	
Reflections: *Think about what you need to change for the next session based on what happened today. Is there something the learners are interested in exploring?* *Are there some things you would like to share with your co-teachers, parents, or school leaders about your classroom experience? What would you like your instructional coach to help you with?* *Reflections may be written in brief notes, bullets, or annotations.*
