## Task Sheet No. 5:
## DAILY LESSON LOG

**INSTRUCTION:**

As a pre-service teacher, you are tasked to develop a **Daily Lesson Log (DLL)** based on the prescribed curriculum (ILAW Framework) and identified Most Essential Learning Competencies (MELCs) or Budget of Work (BoW). Using the provided DLL format and the available learning resources, prepare a complete and coherent lesson log (5 sessions) that demonstrates alignment among the learning competencies and standards, learning objectives, content, learning activities/strategies, instructional materials, assessment, and learning opportunities. Your DLL should reflect appropriate teaching strategies, learner-centered activities, and realistic time allotments that respond to the needs and context of the intended learners. Your completed DLL will serve as a professional teaching document that may be used by your cooperating teacher to review the appropriateness and effectiveness of your planned lesson.

**RUBRIC FOR GRADING:**

| CRITERIA | EXCELLENT | PROFICIENT | DEVELOPING | BEGINNING |
|---|---|---|---|---|
| **Intensions (20%)** | Intentions are clearly and appropriately stated, with relevant learning competencies accurately articulated. Strong coherence and alignment are evident across all sections of the DLL. ✓ | Intentions are clearly stated, with appropriate learning competencies articulated. Coherence and alignment are evident across most sections of the DLL, with only minor inconsistencies. | Intentions are partially stated, and the learning competencies are somewhat appropriate but may require clarification. There are inconsistencies across several sections. | Intentions are unclear, incomplete, or inappropriate, and the learning competencies are not articulated. Little or no alignment is evident across the sections of the DLL. |
| **Learning Experience Design (20%)** | The learning experience is clear, detailed, and logically sequenced. Another teacher can implement the lesson independently without additional explanation. Learning design principles are intentionally and consistently embedded throughout the lesson. ✓ | The learning experience is clear and logically organized. Another teacher can implement the lesson with minimal clarification. Learning design principles are appropriately embedded in most parts of the lesson. | The learning experience is partially clear or inconsistently organized. Another teacher may require additional explanation to implement some parts. Learning design principles are partially evident. | The learning experience is unclear, incomplete, or poorly organized. Another teacher would require substantial explanation to implement the lesson. Learning design principles are not evident or appropriately embedded. |
| **Learning Experience for Opportunities and Inclusivity (20%)** | The learning experience maximizes available opportunities for integration and contextualization. Activities are highly relevant to learners' experiences and are inclusive and responsive to learners with disabilities, barriers, and diverse or unique contexts. | The learning experience provides appropriate opportunities for integration and contextualization. Activities consider learners' needs and are generally inclusive and supportive of learners with disabilities, barriers, and diverse contexts. ✓ | The learning experience demonstrates limited integration and contextualization. Some learner differences and barriers are considered, but support and inclusive strategies are inconsistent or incomplete. | The learning experience shows little or no integration or contextualization. Learners with disabilities, barriers, and unique contexts are not adequately considered. |

| | | | | |
|---|---|---|---|---|
| **Assessment Strategies (20%)** | Assessment strategies are intentionally integrated throughout the session and effectively monitor learners' progression. They generate clear and sufficient evidence of whether learning outcomes have been achieved and inform subsequent teaching decisions. ✓ | Assessment strategies are integrated at appropriate points in the session and provide evidence of learners' progress and achievement. The results generally support instructional decisions. | Assessment strategies are present but inconsistently integrated. They provide limited evidence of learners' progression or achievement and only partially inform instructional decisions. | Assessment strategies are limited, inappropriate, or disconnected from the learning experience. They provide little or no evidence of learners' progress or achievement. |
| **Ways Forward and Interventions (20%)** | Ways forward and interventions are specific, practical, and actionable, clearly indicating how learning will be extended, enriched, or adjusted based on learner performance and reflection. ✓ | Ways forward and interventions are appropriate and actionable, providing reasonable adjustments or extensions based on learner performance and reflection. | Ways forward and interventions are general or partially actionable. Connections to learner performance and reflection are limited. | Ways forward and interventions are unclear, impractical, or absent, with little evidence that learner performance or reflection informs subsequent learning. |

# Task Sheet No. 5
# DAILY LESSON LOG

| | |
|---|---|
| **Lesson Title** | Beverage Service: Differentiating Alcoholic and Non-Alcoholic Drinks |
| **Learning Area/s** | TLE – FCS Food Service |
| **Name of Student Teacher/s** | John Brix G. Coronejo |
| **Name of Cooperating Teacher** | Cristy S. Conopio |
| **Grade Level and Section** | Grade 10 – ANTHURIUM / ASTER |
| **No. of Sessions** | Five (5) Sessions |
| **References**<br>*Books, websites, toolkits, etc.* | DepEd MATATAG Curriculum Guide for TLE – Food Service<br>Budget of Work for Grade 10 – TLE: FCS – Food Service<br>LCD presentations, instructional video clips, empty commercial beverage packaging, and demonstration materials |
| **Declaration of AI use**<br>*Cite how AI was used in the formulation of the lesson plan. See DO3. 2. 2026 Annex A* | AI was used to organize the DLL structure, align objectives with the MATATAG Lesson Exemplar, improve wording, and suggest integration opportunities.<br>The teacher reviewed and validated all content before use. |

## Intentions

Meaningful learning experiences are anchored in how we frame them. Start by deciding what you want learners to master by the end of the lesson – keep it clear and simple.
Remember: Understanding your learner's evolving context and designing around it ensure that your lessons connect with and are relevant to them.

| | |
|---|---|
| ***Learning Competency and Curriculum Standards:*** *Write the competency/ies from the curriculum that we are targeting, and the content or performance standards applicable to the sessions* | **Learning Competency:**<br>• Differentiate alcoholic and non-alcoholic beverages.<br><br>**Content Standards:**<br>The learners should have knowledge and understanding of:<br>• The learners demonstrate an understanding of the concepts and principles of alcoholic and non- alcoholic beverages.<br><br>**Performance Standards:**<br>By the end of the term, the learners are able to:<br>• The learners create non-alcoholic beverages following the safety precautions that can be used in generating business. |

| | Session 1 | Session 2 | Session 3 | Session 4 | Session 5 |
|---|---|---|---|---|---|
| ***Learning Objectives:*** *Write the smaller knowledge, skills, or tasks from the competency that the learners will work on and be able to show by the end of the sessions.* | • **Knowledge:** Identify the definition of beverages and differentiate alcoholic from non-alcoholic drinks.<br>• **Skill:** Categorize various commercial drinks into alcoholic and non-alcoholic groups.<br>• **Attitude:** Appreciate the importance of beverages in enhancing guest dining satisfaction. | • **Knowledge:** Identify the subcategories of non-alcoholic drinks (hot, cold, carbonated, juices, specialty) and their ingredients.<br>• **Skill:** Prepare a descriptive beverage menu segment highlighting popular non-alcoholic options.<br>• **Attitude:** Value precision and hygiene in non-alcoholic beverage presentation. | • **Knowledge:** Explain the characteristics of fermented and distilled alcoholic beverages.<br>• **Skill:** Examine beverage product labels to determine alcohol content and base ingredients.<br>• **Attitude:** Demonstrate maturity and professionalism when discussing alcoholic drinks. | • **Knowledge:** Compare the standard bar glassware, garnishes, and serving temperatures for various beverages.<br>• **Skill:** Demonstrate proper matching of beverages to their designated glassware.<br>• **Attitude:** Value precision and elegance in glassware pairing and table beverage setup. | • **Knowledge:** Discuss responsible beverage service, legal age limits, and the health effects of alcohol.<br>• **Skill:** Perform role-play demonstrations on taking beverage orders and offering non-alcoholic alternatives.<br>**Attitude:** Demonstrate honesty during assessment and practice responsibility in |

| | | | | | |
|---|---|---|---|---|---|
| | | | | | beverage service. |
| ***Learner Context:*** *Write your observations of your learners, and how they have been performing or responding to learning experiences recently. Include strengths, interests, and possible barriers to learning.* | Learners are familiar with everyday consumer beverages (juices, sodas, bottled tea, coffee) and have seen alcoholic drinks in commercial retail or community gatherings. However, they require formal grounding in technical classifications, alcohol by volume (ABV), standard bar glassware pairing, and professional standards for responsible service under Philippine laws and hospitality guidelines. | | | | |

## Learning Experience

Learning experience is like a thoughtfully designed journey. Each activity and intersection builds towards meaningful understanding and growth. Identify activities and interactions to help learners gain knowledge, skills, or understanding in a purposeful and coherent way.

| | | | | | |
|---|---|---|---|---|---|
| ***Pre-Lesson:*** *Describe how you will help the learner get ready for the lesson.* | Learners examine flashcards of common drinks and identify whether they are refreshing, stimulating, or intoxicating. | The teacher reviews beverage definitions and asks learners to share their favorite non-alcoholic drinks during family gatherings. | Learners observe empty product bottles and identify details such as brand names, warnings, and alcohol percentages. | The teacher displays outlines of bar glassware and asks learners to guess which drinks belong in each glass. | Learners review key weekly terms and prepare their testing materials following standard classroom routine instructions. |

| | | | | | |
|---|---|---|---|---|---|
| ***Lesson Flow:***<br>*Describe the activities that you can implement in 1 or more session to meet your intentions.*<br><br>Apply the Learning Design Principles, use the prompts below as a guide. Note, not all principles are expected in every lesson.<br>• *Make the objectives clear for the learners*<br>• *Guide learners before letting them try the task on their own*<br>• *Check the state of the learners' well-being, understanding, and mastery over the lesson*<br>• *Connect today's new concepts to past competencies*<br>• *Encourage collaboration among learners* | • The lesson begins with an introduction to beverages and their operational role in food and beverage services.<br>• The teacher explains the primary distinction between alcoholic and non-alcoholic drinks based on the presence of ethyl alcohol.<br>• Learners sort sample | • The lesson focuses on the types of non-alcoholic drinks: refreshing (water, juices), stimulating (coffee, tea), and nourishing (milk, smoothies).<br>• The teacher demonstrates how specialty mocktails are conceptualized using non-alcoholic syrups and garnishes.<br>• Learners draft an afternoon beverage card highlighting ingredients, | • The lesson covers alcoholic beverages by distinguishing fermented drinks (beer, wine) from distilled spirits (vodka, rum, gin, whiskey).<br>• The teacher discusses alcohol by volume (ABV) and explains how raw agricultural ingredients transform into alcoholic products.<br>• Learners examine clean commercial beverage labels in pairs | • The lesson addresses standard glassware pairing, including highball, rock, wine goblet, collins, and flute glasses.<br>• The teacher presents comparative matrices showing the serving temperature, garnish, and dining role for each drink type.<br>• Learners match drink scenarios with correct bar | • The lesson explores responsible beverage service standards, guest safety protocols, and Philippine legal age restrictions.<br>• The teacher administers the Week 5 Summative Quiz covering beverage categories, production processes, and service etiquette.<br>• Learners perform short role-play simulations demonstrating |

| | | | | | |
|---|---|---|---|---|---|
| • *Invite learners to reflect on why this matter to them*<br>• *Ensure inclusion for learners' varied abilities, learning styles, and contexts* | beverage names into alcoholic and non-alcoholic charts through a collaborative board activity. | classifications, and serving temperatures. | to determine alcohol percentage and production classifications. | glassware and justify their choices based on temperature and presentation. | how to recommend non-alcoholic alternatives to guests. |
| ***Learning Resources:***<br>*List down the learning resources that will help you reach your objectives. Ensure that they are available and inclusive.*<br><br>*Include options and alternatives in case of emergencies.* | PowerPoint presentation, beverage classification charts, flashcards, and student activity sheets. | Empty beverage containers, menu templates, visual recipe infographics, and video clips. | Empty bottles/cans with visible labels, fermentation vs. distillation process diagrams, and charts. | Actual bar glassware or illustrated glassware flashcards, beverage pairing charts, and worksheets. | Printed assessment questionnaires, pens, scoring rubrics, and scenario task cards. |
| ***Opportunities for Integration and Contextualization:***<br>*Write down any possibilities to meaningfully connect to another learning area,* | Science: Chemical composition of ethyl alcohol and physiological hydration. | Health & Nutrition: Evaluating sugar content and nutritional value in refreshing and nourishing drinks. | Science & History: Biochemical fermentation, distillation principles, and traditional | Arts & Design: Aesthetic presentation, glassware symmetry, and | Values Education & ESP: Honesty during assessment, legal awareness, and practicing |

| | | | | | |
|---|---|---|---|---|---|
| *special topic, local context, or technology. Write N/A if none.* | | | Philippine beverages (*lambanog, tuba*). | visual garnishing in table setups. | responsible guest hospitality. |

## Assessing Learning

Assessments reveal what learners have gained and what they still need help with. These are helpful in providing you with information to guide your future instruction throughout the entire session.

| | | | | | |
|---|---|---|---|---|---|
| ***Formative Assessment:*** *Create a task, activity or questions to assess learning and provide feedback every now and then. Include ways for learners to ask for guidance or support throughout each session.*<br><br>*Remember to provide appropriate accommodation so all learners can demonstrate their understanding (e.g. varied response formats, small group options, visual or auditory supports).* | Learners complete a beverage sorting worksheet; the teacher assesses classification accuracy and concept recall. | Learners present their non-alcoholic beverage menu cards; the teacher evaluates descriptions and groupings. | Learners answer an exit ticket differentiating fermented from distilled spirits; the teacher checks conceptual clarity. | Learners complete a glassware matching exercise; the teacher checks pairing accuracy and service temperature knowledge. | Learners answer the 20-item summative test and execute role-play scenarios; the teacher grades outputs using a rubric. |

## Ways Forward

Meaningful learning can also happen beyond the classroom – for both the learners and the teacher. Pause and reflect on what happened today.

| | | | | | |
|---|---|---|---|---|---|
| ***Extended Learning Opportunities:*** *Suggest other learning experiences outside the classroom/class hours that learners may want to access to reinforce what they have learned, to spark their curiosities further, or that may provide them support in their areas of difficulty.* | Learners list five beverages found at home and identify whether they are alcoholic or non-alcoholic. | Learners research a traditional Filipino non-alcoholic cooler and write down its basic ingredients. | Learners inspect commercial beverage packaging in a local grocery store to note ABV percentages. | Learners sketch three standard bar glasses in their notebooks and list two beverages paired with each. | Learners design a personal slogan or digital poster promoting responsible drinking awareness among youth. |
| ***Reflections:*** *Think about what you need to change for the next session based on what happened today. Is there something the learners are interested in exploring?*<br><br>*Are there some things you would like to share with your co-teachers, parents, or school leaders about your classroom experience? What would you like your instructional coach to help you with?* | | | | | |

| | | | | | |
|---|---|---|---|---|---|
| *Reflections may be written in brief notes, bullets, or annotations.* | | | | | |
